Adeshola John

Frontend Developer · Full-Stack (React, Node.js)

Lagos, Nigeria · Open to remote work · josephjohnadesola@gmail.com · +234 810 922 3641 · LinkedIn · [Portfolio URL] · [GitHub URL]

Summary

Frontend-focused full-stack developer with 3+ years of professional experience building responsive, mobile-first web interfaces and the Node.js and PostgreSQL APIs behind them. Freelance since January 2025, delivering dashboards, business websites, and portals for clients. Previously a backend developer who cut API response times by 40%. Comfortable owning a project from design handoff through to deployment.

Skills

Frontend: React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, responsive and mobile-first design

Backend and data: Node.js, Express, REST APIs, PostgreSQL, SQL, JWT authentication

Deployment and workflow: Netlify, Render, Railway, VPS hosting, Agile, code reviews

Experience

Freelance Full-Stack Developer — Remote

Jan 2025 – Present

- Build and deploy responsive websites and web apps for business clients, including an analytics admin dashboard, a healthcare appointment site, a job board, an accounting-firm website, and a school portal.
- Develop mobile-first UI components with React, HTML, CSS, and JavaScript that work cleanly across phones, tablets, and desktops.
- Created reusable backend modules that cut development time on later projects by 30%.
- Deploy to Netlify, Render, Railway, and VPS servers, and consistently deliver on deadline with high client satisfaction.

Backend Developer — RiverTech Digital

May 2023 – Dec 2024

- Improved API response time by 40% by restructuring queries and caching high-traffic routes.
- Led backend development for 3 major feature releases.
- Designed Node.js and Express API endpoints serving internal and client-facing platforms.
- Built PostgreSQL schemas with indexes and optimized joins, wrote reusable JWT authentication and request-validation middleware, and integrated email, payment, and notification services.
- Took part in code reviews and sprint planning in an Agile team.

Backend Developer Intern — TechSolve Innovations

Jan 2022 – Aug 2022

- Worked with designers and frontend developers to connect UI features to REST APIs built with Node.js and Express.
- Contributed to a project that reduced support-ticket errors by 25% through stronger backend validation.
- Helped optimize database queries, speeding up API responses by 18%.

Projects

Personal Portfolio (full-stack) — React, Tailwind CSS, Node.js, Express, PostgreSQL

- Built the frontend and backend for my portfolio, including admin login with JWT authentication, project management, and a contact-form API.

LandingKit — modular landing page template system

- Created a reusable landing page template system with responsive layouts and smooth interactions.

Selected live projects

- Aase Tech Admin — analytics admin dashboard
- ApexMedical — healthcare and doctor-appointment website
- JobVibe — job discovery and hiring website
- St. Jude International College — student and teacher portal
- LedgerCloud — website for a remote-first accounting firm
- AASD Clothing — [one line: what it does]
- Cargel — [one line: what it does]

Education

B.Sc. Computer Science — Federal University of Agriculture, Abeokuta (FUNAAB)

2024 – 2027 (expected)

Relevant coursework: Data Structures, Web Development, Database Management, Software Engineering
